
approximation
$\bar{d}$ = 5.698 µm, $\sigma(d)$ = 0.091 µm
using sin(arctan)
$\bar{d}$ = 5.725 µm, $\sigma(d)$ = 0.090 µm
probability density
slit width d in µm
approximation
using sin(arctan)
[5.517, 5.873] µm; Gaussian: [5.520, 5.876] µm
[5.543, 5.897] µm; Gaussian: [5.548, 5.902] µm
cumulative probability
slit width d in µm
